

# BGA-125 " 32mm Aluminum Edge

Barre de 3.65m

This is an example of the Router Bit to be used:

3-Wing Slot Cutter, 1-7/8" DIA. 5/64" KERF

- Route a groove along the table top outer edge.
- The groove should be centered down the middle of a 1-1/4" (including laminate) top.
- After routing, gently hammer edging into slot using a rubber mallet.

Note: The BGA-125/225 Edging has a maximum bend radius of 4 inches (10.16cm), around a corner i.e.:

8" (20,32cm) Diameter Circle
